

Roger Harris, CFPIM, CIRM, C. P.M., PMP, CSCP, CPSM, CLTD
President & General Manager, MSS Technologies, LLC.
President and Coach, Colorado ASCM Chapter

Roger brings 39 years' experience to MSS in manufacturing and materials management in the defense/weapons, electronics, industrial products, and commercial aerospace industries. Additionally Roger has assisted many clients in the implementation of world-class manufacturing techniques from the following industries: food and service parts distribution, electronics, apparel manufacturing, custom tooling and aerospace manufacturing. In his career Roger has been instrumental in achieving profit-impacting results for his employers and clients through inventory reductions, lead time reductions, and valid shop priorities.

Roger holds 7 professional certifications in Production and Inventory Management (CFPIM), Integrated Resource Management (CIRM), Purchasing Management (C.P.M.), Project Management Professional (PMP), Certified Professional in Supply Management (CPSM), Certified in Logistics, Transportation and Distribution (CLTD), and Certified Supply Chain Professional (CSCP). **He has a Bachelor of Science Degree majoring in Production and Operations Management from Colorado State University and a Master of Science Degree in Organizational Management and Transportation / Distribution Management from the University of Colorado.**

Roger is a member of the adjunct faculty at the University of Denver and a certified instructor for ASCM, The Association for Supply Chain Management, and has instructed over 8000 students in Supply Chain Management. Roger has held several board of director positions for ASCM Colorado, including 10 terms as president over the past 28 years. In addition, Roger serves on many national and international APICS committees. Roger is currently the President for the Colorado ASCM Chapter and President & GM of MSS Technologies, LLC.
